Athena is proud to present its **New BIG bore cylinder Kit** for **SUZUKI RMZ450** replacing the OE cylinder and piston with a BOLT-ON version, in other words it can be installed without any crankcase modification. The cylinder is matched with a forged piston which is lighter than the OE, to reach best performances and reliability. The gaskets have been developed using last generation technologies; in particular the multilayers head gasket provides a new system of reliefs that guarantees a perfect seal even at high temperatures. The nickel cylinder is matched with a new lighter forged piston. Thanks to the Athena's high quality standards and to its production method with CNC machines, the kit guarantees an unbeatable quality-price ratio.
